

## MEMORY GAME by JIPE for MSX22dev

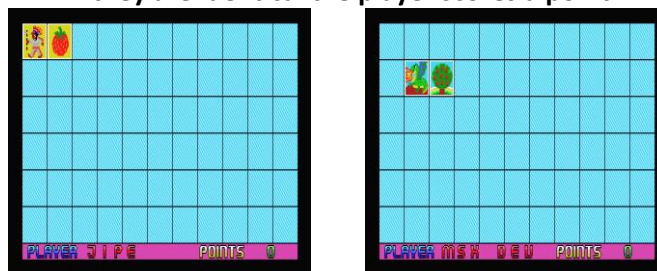

One to four player game with two levels

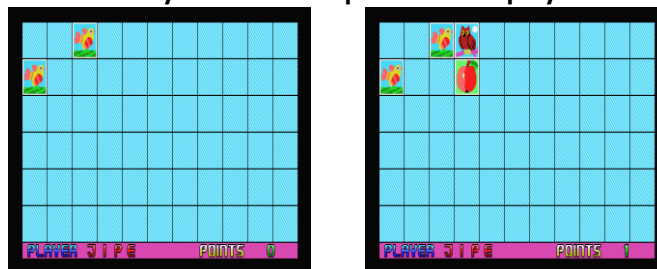

Enter names of players with the keyboard

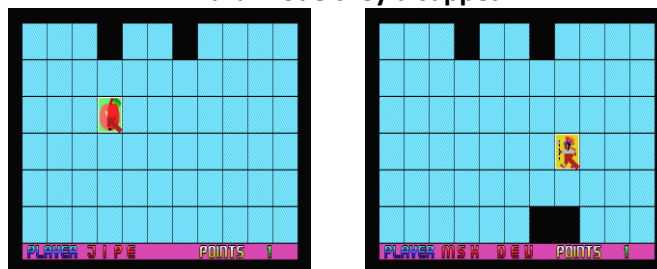

Is played with the keys of the keyboard and space  
or a gamepad in port 1 with a fire button  
The goal is to turn over two cards on the board  
If they are identical the player scores a point

In easy mode the maps remain displayed

In hard mode they disappear

At the end of the game the scores are displayed
