SYNOPSIS

For a long time, in a quiet town, people have not stopped disappearing. The last case being a young girl. The inhabitants think that the disappearances may be related to the new social engineering research center that they have installed in the north of the quiet town. Many have tried to enter to see what is cooking there, but no one has returned to tell the tale.
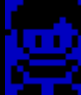

Sami, is the brother of the last case, a young girl of 6 years. Despite the obvious risk he will not give up and will enter that fearsome center to return to his sister, safe and sound.

CONTROL

1 - Keyboard (QAOP Space)
2 - Kempston
3 – Sinclair

Perform the following functions;
Up, Down, Left, Right, Action (Stealth, Crouch, Push)

HOW TO PLAY

Help Sami find her sister inside the fearsome Social Engineering Research Center. But be very careful, they have a very advanced security and surveillance system.

You will have to pass through all the rooms until you find the girl. However, the rooms are protected by a code system and without it you will not be able to move forward (see images)

Collect the floppy disks and instruct a computer to read the content. Inside there may be the access code for the next room (see image)

CODIGO DE ACCESO
191

It will not be easy, you will find obstacles and surveillance systems that can destroy your objective.

AI Robots (advanced)

These Robots have the ability TO SEE and HEAR ! ! !

So you will have to be very careful and walk in stealth mode not to attract their attention and ring any alarm bells. In addition, they are able to move in 4 directions deciding for themselves which direction to take at all times.

Cardboard Boxes

In some levels, you can find cardboard boxes. These can help you camouflage yourself and thus not be seen by the Robots. But beware!!! If you move within their visual field or make noise while walking you could be discovered.
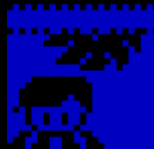

Security Cameras

Some rooms are equipped with security cameras. If you enter within its viewing angle all alarms will go off and the Robots will be alerted. You'll have to find a way to disable them.

Wagons

You may come across a cart that blocks your path. You can push it both horizontally and vertically to move it out of your way. Also, in some case, you could use them to your advantage, in order to block the Robots.

Saws

Be careful with saws, they can cut you and cause you to lose a life. Get down at the right moment and run !!!

Electrified Doors

You will have to go through them very quickly if you do not want to be electrocuted and lose a life. But beware !!! Do not forget that when you run your steps will be heard by the Robots.
