

A CRAZY BRITISH PLATFORMER WITH BRAINCRASHING MECHANICS!

EFMB IS A REMAKE OF THE
GAME CREATED BY DAVE
HUGHES FOR THE SINCLAIR
ZX SPECTRUM IN 2012

Play as Moebius or Pucky and rescue
hundreds of strange creatures that inhabit
unusual places. Move through teleporters
and from one side of the screen to the
other in a chaotic game experience that
will make your neurons burn as you
progress through the 15 levels.

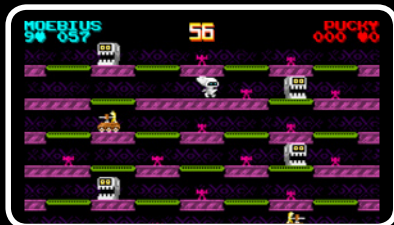

Genre : Platformer

I found the original game amazing: it's a
platformer with simple mechanics that
forces players to use their brain power.
The remake has new stuff and a two player
feature perfect for playing with friends in
cooperative and versus mode.

The new version is here thanks to RGCD, a
team dedicated to publishing and reviewing
new games for vintage computer systems
and consoles. Thanks for bringing the
original to my attention!

FEATURES:

- » Braincrashing gameplay
- » 15 levels, with random graphics
- » 2 players, Cooperative and Versus mode
- » Play with only one hand
